Fringe Detection User Guide

USTC-Software-2015
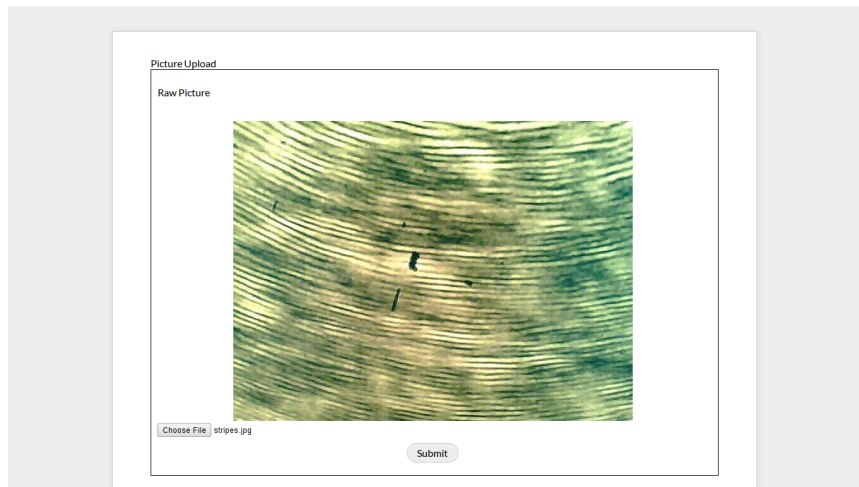

September 15, 2015

Contents

# 1 First step

1. Select a file

2. click submit

After a few seconds, you will see a binarized image.

2   Second step

1. Choose two points from the stripes

(When you move your mouse above the binarized image, you will see the coordinate of the pixel. If it is green, it means you can click that pixel.)

1. Input the parameter α

2. Click submit

Wait a few seconds, and you will get the rank of the initial stripe.
