

Our team: WLSA-Fudan_Shanghai

Our school is located at Yangpu District, Shanghai, and we are the students from WLSA international department.

High school affiliated to Fudan University is one of the best high school in Shanghai, and our school focus a lot on our scientific ability rather than only focus on testing ability. Furthermore, our school is the only one in Shanghai that have our own Molecular Biology Lab.

World Leading Schools Association— WLSA was established in 2011 at the 5th World Leading Schools Forum held in New York. Over the previous seven years, heads from secondary schools all over the world had discussed ways to develop enhanced understanding and cooperation between schools. From these discussions grew the desire to create a formal association of selected leading schools around the world.

Our team members

Neal Wang

I'm the team leader, as a leader, I really "suffered" a lot from my team, but we are a family and we all love each other.

This journey really let me learned a lot, meantime I grow up a lot.

After this, I believe I will have a brilliant life, which connected with Synthetic Biology.

(btw, I wrote this just 20 min before wiki freeze)
